cat STEELMANAGER

Decision Support Solutions

SteelManager comes with its own set of prebuilt reports built using SAP Crystal Reports. This allows you to quickly analyse your data without worrying about report design. We also offer add on options making use of other products from the SAP Crystal Report family. These range from the full version of SAP Crystal Reports that allows you to design and create your own interactive reports or SAP Crystal dashboard design.

Expand your access to Steel Manager data over the Web. The new data driver offers additional Web access to Web services by providing support for RPC encoding of SOAP messages, SSL-secured Web servers, as well as a working compatibility with the WS-Security standard. It adapts to custom logon requirements such as e-mail addresses or user/password.

Key Features

- Use Steel Managers predesigned reports or design your own.
- Connect to the Steel Manager Data web service or exported XML data.
- Use ODBC connections to pull data out into other applications.
- Export your reports to various destinations. PDF Excel etc.
- SAP Crystal Reports software enables you to easily design interactive reports.
- SAP Crystal Dashboard Design, personal edition is an easy introduction to dashboarding functionality.

We are certified as a Microsoft Small Business specialist and have proven experience providing Microsoft products, services and solutions for your small business.

If you have any requirements for OpenEdge ABL development we have the experience. Advanced GUI for .NET, AppServer and other OpenEdge technology expertise available.
